EXPERIENCE

Software Development Student

CodeWorks · March 2022 - June 2022

- Completed 500+ hours building full stack applications both in group settings. and individually.
- Implemented Scrum methodologies while working on applications in group settings.
-
- Keepr - A Pinterest-inspired app where users can interact with "Keeps" by storing them in their own public or private "Vaults"
-
- Planit - A Trello inspired app where users can create "Projects" which can then contain "Sprints" which each have their own weighted tasks
-
- Tower - An event planning app similar to Ticket Master. Users can create events, which other users can see, keep track of, as well as comment on by obtaining Tickets through the event page.

Senior Commercial Manager

Truckstop.com · May 2019 - March 2022

- Troubleshot various technical issues dealing with Mac/Windows machines, printers, network, VPN and phone systems.
- Worked with third-party vendors to resolve issues with hardware or software covered by annual maintenance agreements.
